

West Coast Chinese Veterinary Herbology Seminar 2009

Bai Zhu - *Atractylodes*

Program Introduction

As more and more veterinarians have requested to learn about herbology, Chi Institute is proud to present its **West Coast Chinese Veterinary Herbology Program**. This program is for licensed veterinarians only and is divided into three modules:

- 1) Tonic Herbs & Clinical Application
- 2) Pathogen-Clearing Herbs & Clinical Application
- 3) Qi-Blood Regulating Herbs & Clinical Application

Each module includes the understanding of the most commonly used individual herbs and formulas, and

how to integrate the use of Chinese herbals in your veterinary practice.

Each module, offered every 3 years, is a stand alone module, and can be taken in any sequence. It doesn't matter where you start. After you complete all three modules, you can choose to fulfill the requirements for the certification as a **Certified Veterinary Herbalist**.

We hope this program will provide West Coast veterinarians with easier access in the continued study of TCVM and personal enrichment.
